VOLUME 28 · SUBJECT INDEX

- Acadesine, Acadesine extends the window of protection afforded by ischaemic preconditioning, 379
- Acetylcholine
Contribution of endothelium derived relaxing factors to acetylcholine induced vasodilatation in the rat kidney, 1373
Responses to histamine and acetylcholine in isolated monkey mesenteric veins versus arteries, 667
- Acidosis
Acidosis and arrhythmias in cardiac muscle: *review article*, 1312
Age related differences in the response to acidosis, hypoxia, and hyperkalaemia in canine cardiac Purkinje fibres, 125
Effects of acidosis and hypoxia on the response of isolated ferret cardiac muscle to inotropic agents, 1209
- Action potential
Cellular electrophysiology in cardiac hypertrophy and failure: *review article*, 933
Effect of lemakalim on action potentials, intracellular calcium, and contraction in guinea pig and human cardiac myocytes, 851
Fosinoprilate prolongs the action potential: reduction of I_K and enhancement of the L-type calcium current in guinea pig ventricular myocytes, 201
Ionic basis of action potential prolongation of hypertrophied cardiac myocytes isolated from hypertensive rats of different ages, 1180
Mechanically induced changes in action potential duration and left ventricular segment length in acute regional ischaemia in the in situ porcine heart, 528
Prolongation by captopril of action potential duration in the normal and hypertrophied rat ventricle: direct action or inhibition of the local angiotensin converting enzyme? 221
- Adenosine
Acadesine extends the window of protection afforded by ischaemic preconditioning, 379
Adenosine: a sensitive marker of myocardial ischaemia in man, 656
Adenosine blockade during reperfusion reverses the infarct limiting effect in preconditioned canine hearts, 1083
ATP gated potassium channels in acute myocardial hibernation and reperfusion, 872
ATP sensitive potassium channels are involved in adenosine A_2 receptor mediated coronary vasodilatation in the dog, 906
Cardiovascular effects of a non-xanthine-selective antagonist of the A_1 adenosine receptor in the anaesthetized pig, 621
Changes in interstitial adenosine during hypoxia: relationship to oxygen supply:demand imbalance, and effects of adenosine deaminase, 1320
Effects of adenosine on atrial refractoriness and arrhythmias, 1385
Effects of xanthine amine congener on hypoxic coronary resistance and venous and epicardial adenosine concentrations, 604
Endothelial nucleotide catabolism and adenosine production, 100
Purinergetic modulation of adult guinea pig cardiomyocytes in long term cultures and co-cultures with extracardiac or intrinsic cardiac neurones, 673
Responsiveness of in situ canine nodose ganglion afferent neurones to epicardial mechanical or chemical stimuli, 1218
- Adenosine A_1 receptor
 A_1 receptor mediated myocardial infarct size reduction by endogenous adenosine is exerted primarily during ischaemia, 270
Stimulation of endothelial adenosine A_1 receptors enhances adhesion of neutrophils in the intact guinea pig coronary system, 1366
- Adenosine agonists/antagonists, Preconditioning of isolated rabbit cardiomyocytes: induction by metabolic stress and blockade by the adenosine antagonist SPT and calphostin C, a protein kinase C inhibitor, 72
- Adenosine nucleotides, Determination of high energy phosphates and glycogen in cardiac and skeletal muscle biopsies, with special reference to influence of biopsy technique and delayed freezing, 524
- Adenosine receptor
Adenosine receptor specificity in preconditioning of isolated rabbit cardiomyocytes: evidence of A_1 receptor involvement, 1049
Evidence that the adenosine A_1 receptor may mediate the protection afforded by preconditioning in the isolated rabbit heart, 1057
- Adenosine triphosphate, Responsiveness of in situ canine nodose ganglion afferent neurones to epicardial mechanical or chemical stimuli, 1218
- Adenosine triphosphate sensitive potassium channels
ATP sensitive potassium channel openers are of potential benefit in ischaemic heart disease, 32: *invited letters*, 135, 286
Blockers of ATP sensitive potassium current are of potential benefit in ischaemic heart disease, 31: *invited letters*, 135, 286
Effect of an ATP sensitive potassium channel opener, levcromakalim, on coronary arterial microvessels in the beating canine heart, 1780
Electrophysiological effects of ATP sensitive potassium channel modulation: implications for arrhythmogenesis: *review article*, 16
Protective effects of ATP sensitive potassium channel openers in models of myocardial ischaemia: *review article*, 778
Role of ATP sensitive potassium channel in extracellular potassium accumulation and cardiac arrhythmias during myocardial ischaemia: *review article*, 762
- Adhesion molecules, Role of selectins, a new family of adhesion molecules, in ischaemia-reperfusion injury: *review article*, 289
- Aequorin, Estimates of beat to beat handling of activator calcium using measurements of $[Ca^{2+}]_i$ in aequorin loaded ferret cardiac muscle, 40
- Aging, Role of aging on electrical, mechanical, and coronary modifications induced by ouabain and epinephrine in isolated rat heart, 358
- Aging heart, Morphometry of arterioles and capillaries in hearts of senescent mice, 969
- Aldosterone, Aldosterone and cardiac fibrosis, 1863
- Almokalant, Induction of rhythm abnormalities in the fetal rat heart. A tentative mechanism for the embryotoxic effect of the class III antiarrhythmic agent almokalant, 337
- Alpha adrenergic receptors, Coronary artery constriction in rats affects the activation of α_1 adrenergic receptors in cardiac myocytes, 1070
- Alpha adrenoceptor blockade, Effects of sympathetic stimulation, with and without previous α_1 and β adrenoceptor blockade, on refractoriness dispersion in canine heart, 1787
- Alpha tocopherol analogue, Beneficial effects of MDL 74,405, a cardiospecific water soluble α tocopherol analogue, on the recovery of function of stunned myocardium in intact dogs, 235
- 5-Amino-1-beta-D-ribofuranosylimidazole-4-carboxamide riboside, Timely administration of AICA riboside reduces reperfusion injury in rabbits, 1003
- 21-Aminosteroids, Effects of 21-aminosteroids in neonatal rat cardiac myocyte cell cultures exposed to free radicals, 1500
- Amiodarone, Amiodarone protection against myocardial injury and fibrosis induced by isoprenaline is abolished by thyroid hormone, 1008
- Anaemic hypoxia, Alterations in the myocardial creatine kinase system during chronic anaemic hypoxia, 86
- Anaesthesia
Anaesthetics alter the magnitude of infarct limitation by ischaemic preconditioning, 1574
Effects of anaesthesia and recent surgery on diastolic function, 325
The use of anaesthesia in experimental research: *invited letter*, 432
- Analysis of variance, Repeated measurements and multiple comparisons in cardiovascular research, 303

- Angiotensin converting enzyme, Cardiac angiotensin converting enzyme and myocardial fibrosis in the rat, 1423
- Angiotensin converting enzyme inhibitors
- Angiotensin converting enzyme inhibitors and cardiovascular remodelling: *review article*, 159
- Antiarrhythmic effects of ACE inhibitors: a matter of faith or reality? *review article*, 173
- Cardioprotection by angiotensin converting enzyme inhibitors - the experimental evidence: *review article*, 183
- Contrasting effects of an angiotensin converting enzyme inhibitor and a calcium antagonist on calcium transients in isolated rat cardiac myocytes, 1407
- Converting enzyme inhibitors in cardiovascular therapy: current status and future potential: *review article*, 146; correction, 435
- Decreased lumen size after balloon injury despite inhibition of neointimal thickening and antivasospastic treatment, 215
- Endothelial protection by converting enzyme inhibitors: *review article*, 166
- Endothelium dependent vasomotor responses to endogenous agonists are potentiated following ACE inhibition by a bradykinin dependent mechanism, 209
- Fosinoprilate prolongs the action potential: reduction of I_K and enhancement of the L-type calcium current in guinea pig ventricular myocytes, 201
- Inhibition of ACE/kininase-II, acute myocardial infarction, and survival: *review article*, 190
- Inhibition of ACE/kininase-II after myocardial infarction - addendum: *viewpoint*, 199
- Prolongation by captopril of action potential duration in the normal and hypertrophied rat ventricle: direct action or inhibition of the local angiotensin converting enzyme? 221
- Angiotensin II
- Angiotensin II associated cardiac myocyte necrosis: role of adrenal catecholamines, 684
- Effect of angiotensin II on noradrenaline release in the human forearm, 663
- Angiotensin II receptor
- Alterations in angiotensin II receptor mediated signal transduction shortly after coronary artery constriction in the rat, 1564
- Angiotensin II receptor binding following myocardial infarction in the rat, 1623
- Animal experimentation
- Animal experiments are useful and necessary in understanding cardiovascular disease: *cardiovascular controversies*, 1104
- Animal research will not provide new therapies for cardiovascular disease: *cardiovascular controversies*, 1103
- Commentaries on this month's Cardiovascular Controversy: the merits and demerits of animal experimentation, 1105-1118
- The role of animal experimentation in cardiovascular therapeutic discovery: *editorial*, 1102
- Anoxia, Neutrophil mediated damage to isolated myocytes after anoxia and reoxygenation, 565
- Antiarrhythmias
- Antiarrhythmic effects of ACE inhibitors: a matter of faith or reality? *review article*, 173
- I_{K1} blockade is a potentially useful antiarrhythmic mechanism: *controversy*, 421; *commentary*, 720
- I_{K1} blockade is unlikely to be a useful antiarrhythmic mechanism: *controversy*, 420; *commentary*, 720
- Antiarrhythmic agents, Induction of rhythm abnormalities in the fetal rat heart. A tentative mechanism for the embryotoxic effect of the class III antiarrhythmic agent almokalant, 337
- Antiatherogenesis, Morphological evidence for the antiatherogenic effect of scaparine in hyperlipidaemic diabetic rabbits, 1679
- Aorta
- Increase in rat aortic endothelial free calcium mediated by metabolically sensitive calcium release from endoplasmic reticulum, 1433
- Mitogens for adult rat aortic vascular smooth muscle cells in serum-free primary culture, 1238
- Suramin inhibits intimal thickening following intima injury in the rabbit aorta in vivo, 1166
- Aortic ring, Enhancement of endothelium dependent relaxation in the rat aortic ring by selenium supplement, 345
- Aortocaval shunt, Captopril treatment does not restore either the renal or the ANF release response during volume expansion in moderate to severe high output heart failure, 1533
- Aprikalim, Comparison of effects of aprikalim and of hypoxic and ischaemic preconditioning on extracellular potassium accumulation, metabolism, and functional recovery of the globally ischaemic rat heart, 864
- Arrhythmias
- Acidosis and arrhythmias in cardiac muscle: *review article*, 1312
- Effect of potassium on the action of the K_{ATP} modulators cromakalim, pinacidil, or glibenclamide on arrhythmias in isolated perfused rat heart subjected to regional ischaemia, 881
- Effects of adenosine on atrial refractoriness and arrhythmias, 1385
- Free radicals and reperfusion arrhythmias: *invited commentaries*, 424
- Heterogeneity in extracellular potassium concentration during early myocardial ischaemia and reperfusion: implications for arrhythmogenesis: *review article*, 770
- Induction of rhythm abnormalities in the fetal rat heart. A tentative mechanism for the embryotoxic effect of the class III antiarrhythmic agent almokalant, 337
- Potassium channel openers are likely to be proarrhythmic in the diseased human heart: *cardiovascular controversies*, 923
- Potassium channel openers are unlikely to be proarrhythmic in the diseased human heart: *cardiovascular controversies*, 924
- Prevention of some hypothermia induced electromechanical changes by calcium channel blockade, 55
- Proarrhythmic potential of the potassium channel openers: *commentaries*, 926
- Rapid and slow components of delayed rectifier current in human atrial myocytes, 1540
- Reperfusion induced arrhythmias are caused by generation of free radicals, 422
- Reperfusion induced arrhythmias are *not* caused by generation of free radicals, 423
- Role of ATP sensitive potassium channel in extracellular potassium accumulation and cardiac arrhythmias during myocardial ischaemia: *review article*, 762
- Arrhythmogenesis
- Effects of contraction-excitation feedback on electrophysiology and arrhythmogenesis in rabbits with experimental left ventricular hypertrophy, 1390
- Electrophysiological effects of ATP sensitive potassium channel modulation: implications for arrhythmogenesis: *review article*, 16
- Role of junctional zone cells between Purkinje fibres and ventricular muscle in arrhythmogenesis, 1277
- Arrhythmogenic effects, Myocardial ischaemia induces platelet activation with adverse electrophysiological and arrhythmogenic effects, 1662
- Arterial diameter, Influence of arterial diameter on vasomotor responses in the porcine coronary vasculature, 695
- Arterial distensibility, Evaluation of reproducibility of a vessel wall movement detector system for assessment of large artery properties, 610
- Arterioles, Morphometry of arterioles and capillaries in hearts of senescent mice, 969
- Atherosclerosis
- Blood cholesterol is causally related to atherosclerosis: *cardiovascular controversies*, 574, 576
